

# IMPACT OF ECAP PROJECT IN UZBEKISTAN

ECAP is very urgent project in Uzbekistan, Uzbekistan is facing new reforms as our country is expecting changes in the structure of agricultural production, environmental area and educational system.

The educational system is requiring changes in study programs and curriculums according to the best experiences so the methodological manual is being promoted by our team for creation of the new study courses.

In study programs a lot of attention will be given to self-education and distance learning. So developed two courses which is going to be offered via distance learning format have an important impact.

ECAP project also improved material technical base. We received a modern computer class with 20 PCs, notebook and projector.

ESRI-Moscow Company donated for us a package of ARCGIS software for teaching purposes.

ECAP project has a positive impact on researchers working on dissertation. The project is increasing interest to environmental issues.

- ✓ two of our project members Akbar Akhmedov and Shukhrat Valiyev will attend a training course on Combating desertification methodologies go to China to during 01-30 September, 2018;
- ✓ two other participants attended training course on environmental engineering and did start their PhD under guidance of EU expert;
- ✓ Davlat Rasulov University of Greifswald for PhD program on topic of application of GIS and Remote Sensing;
- ✓ Project members Burkhon Avutkhonov successfully defended and Kholmurod Jalov is finishing his PhD dissertation on utilization of plant and land resources.

## IMPACT ON DEVELOPMENT OF THE INTERNATIONAL COOPERATION.

University of Granada invited to join the new Erasmus+ CBHE project on joint MS course on environmental engineering. We are working on proposal based on experience of the ECAP project.

L'Aquialla and Padova Universities of Italy also has a proposal to develop a project on efficient utilization agro biodiversity in arid areas of Central Asia.

One of the main impacts of the ECAP project for Uzbekistan specifically for Samarkand State University is that Samarkand State Agricultural Institute is being reorganized and agronomy and crop sciences departments will join our university, we will also have more activities related to this field.
